(54) DETERGENT COMPOSITION

(57) Abstract:

PURPOSE: To provide a detergent excellent in detergency and various conditioning effects by combining an amido-amine amphoteric surfactant, sulfosuccinate anionic surfactant and two kinds of specific high-molecular silicones.

CONSTITUTION: A detergent composition is prepared by mixing an amido-amine amphoteric surfactant (A) [e.g. N-lauroyl-N'-carboxymethyl-N'-(2-hydroxyethyl) ethylenediamine], a sulfosuccinate anionic surfactant (B) (e.g. sulfosuccinate of lauryl alcohol), polyoxyalkylene-modified organopolysiloxane (C) containing 3-30wt.% polyoxyalkylene groups in the molecule and capable of dispersing in water, and a nonvolatile polysiloxane (D) having a viscosity of 5,000cSt or more at 25° C except the component C. The detergent composition is preferably used in shampoo, etc.
